

Chief, Intelligence Information Staff

15 January 1958

THRU : Chief, Industrial Division  
Chief, Shipbuilding Branch

25X1A2a  
Report [REDACTED] dated 28 October 1957. FI Comments on I/SH  
Evaluation.

REF : Office Memo from RGM/PE/E to St/1/13 dated 20 December 1957.

1. In the referenced memo FI takes exception to a correction made by I/SH to the subject CI report regarding the shipyard constructing the atomic icebreaker.
2. Available Soviet press photographs and numerous collateral reports have positively fixed the building location as the south way in the Krylov (formerly Marti) Shipyard in Leningrad. ONI, Admiralty, [REDACTED] all agree to this location.
3. Both the icebreaker and the Hazbek-Class tankers are under construction only in the Krylov yard. As the primary purpose of the source's visit was in connection with the Hazbek-Class tankers building for East Germany, the shipyard referred to in the subject report is the Krylov Shipyard.
